

Furniture: Reception Desks and Nurse Stations

A well-equipped and designed furniture is essential to both the organisation of patient care and the efficiency of the facility's operations.

Depending on user requirements, size restrictions and aesthetics, CS Medical offer non-standard and bespoke nurse stations and reception desks.

Our Specification team collaborates with designers and specifiers to bring the simplest briefs into a premium working-day reality.

Reception desks act as the first point of contact with patients and visitors in any healthcare and medical facility. Forming the first impression, the design of reception desks contributes to creating a soothing and professional atmosphere.
